**Subject:** Academic Advising & Update on Student Teaching

Hi, Dr. Sandell,

I hope your semester has been going great! I haven't talked with you in a while, which I am sure seems odd to even you because by this time most semesters I probably have bothered you multiple times. I can't thank you enough for everything you have done. I have been fortunate to have you as my advisor and I wouldn't have made it through so smoothly without your help.

My semester has been going so fast. Student teaching at Montgomery-Lonsdale Elementary East has been a blast. I am working with 27 first graders, and I am really enjoying the learning we do together. I start my school day at 8:10am and students arrive at 9:05am. This was something new to me. I have never been to a district starting so late, but I am enjoying the different schedule.

I hope the rest of your semester goes great, and I can't believe that graduation is so rapidly approaching. I'm sure I will email you with some questions at some point, but until then I hope everything goes well for you.

Thanks for everything!

All the best,

Levi Olstad
